Picture a brand-new world!

Now, disc photography from Kodak really simplifies picture-taking.

Just slip a thin disc of film into a camera small enough to fit in the palm of your hand.

Press a single button. The disc camera's advanced electronics take it from there. And the 4-element glass lens and fast film mean you can get sharp, clear pictures even in low-light conditions.

Choose from three disc cameras from Kodak. Turn the wheel for more information about them.

Now, Kodamatic™ instant cameras and film give you amazing pictures more easily, and more often.

Cameras and film work together to help expand picture-taking capability and deliver beautiful, high-quality color by Kodak.

The cameras flash every time. Outdoors this reduces contrast, fills in shadows. Indoors, it adds pleasing detail to backgrounds.

There's little waiting between pictures, because Kodamatic cameras recycle quickly. And they fold flat for easy carrying.

To learn more about the three folding models, turn the wheel.

Borrow a new camera — it's free!
